

"Elavon selected Pacom because it was the corporate standard for our parent company, US Bank of Minneapolis and with the **expert recommendation of our preferred service provider, i-sys.**"

The Pacom system enabled us to consolidate 11 different card-access systems that serve 18 facilities around the world. Our Pacom system centralizes all aspects of physical security into one global network that provides better management control and oversight."

Greg Pikulski
Vice President, Global Facilities - Elavon

Elavon Global Payment Solutions

I-sys builds strong world-wide partnerships.

CUSTOMER BENEFITS

CUSTOMER WITH A GLOBAL REACH

With corporate offices on two continents, Elavon is an innovative financial services company that securely and reliably manages single-source payment processing for a global roster of clients and business partners. Elavon sets new standards in convenience, reliability and innovation by providing end-to-end payment processing services to merchants and financial institutions in the United States, Puerto Rico, Canada and Europe.

Elavon's international payment processing platform is one of the most powerful networks in the world. Every day, more than one million merchants trust Elavon to efficiently and securely manage their payment transaction business.

Elavon's payment products include credit and debit card processing, electronic check services, gift cards, dynamic currency conversion, multi-currency support, and cross-border acquiring. Elavon handles every aspect of the acquiring relationship—transaction processing, risk and underwriting, settlement, equipment deployment, chargeback management, reporting and customer service.

Merchants in 30 countries and 1,500 bank-clients rely on Elavon to accurately process a wide range of financial transaction types, 24 hours a day, and seven days a week.

"We handle transactions from thousands of worldwide locations, process them across our secure processing network, transmit them to card associations and authorization networks, and fund them via our proprietary accounting and settlement system" states Greg Pikulski, Vice President, Global Facilities for Elavon.

INTERNATIONAL CHALLENGE

According to Greg Pikulski, Elavon's primary challenge was to find a provider who could consolidate multiple access systems, ease the administrative burden and reduce costs related to supporting globally diverse financial products... *simultaneously*. In 2006, **with a strong recommendation from Bill Ohlendorf, president of Charleston-based, i-sys, Elavon selected global security solutions provider, Pacom Systems to solve their challenge.**

Elavon Global Payment Solutions

A GLOBAL SOLUTION

Pacom Systems is a global leader in integrated security solutions that communicate over a customer's existing IP network... in the financial, banking and remote managed services markets. Pacom's solutions are based on a data communications platform that successfully balances security and IT applications on one secure network.

"We selected Pacom Systems because it was the corporate standard for our parent company, US Bank of Minneapolis... and with the expert recommendation of our preferred service provider, i-sys," states Greg Pikulski.

"The Pacom system enabled us to consolidate 11 different card access systems that serve 18 facilities around the world. Our Pacom system centralizes all aspects of physical security into one global network that provides better management control and oversight," said Mr. Pikulski.

I-SYS: BUILDING STRONG GLOBAL PARTNERSHIPS

Phil Sayers, *i-sys UK* states, "At *i-sys*, we only partner with premium systems integrators and "best of breed" product manufacturers who deliver customized solutions that meet complex client challenges with superior customer service."

Phil Sayers continues, "Reliability, flexibility, performance and a 20-year history of providing integrated security solutions to a global marketplace are the reasons we recommended Pacom Systems to Elavon."

I-SYS SERVES CUSTOMERS IN MAJOR BUSINESS CENTERS AROUND THE WORLD.

i-sys serves customers on both continents and throughout the world. Four offices in the United States and an office in the UK are supported by a network of integrators who cover every major business center in the world.
